

KrishiVision AI - Smart Crop Monitoring Report

Farmer: vijayalaxmi

District: Davanagere

Crop: Sugarcane

Date Generated: Color(0,0,0,1)

Diagnostics Analytics

Metric	Value	Description
Crop Health Status	Unhealthy	General vegetation health density index
Growth Stage	Maturity	Current growth cycle estimation stage
Calculated Area	2.3 Acres	Agricultural bounds measured
Avg NDVI Index	0.09	Normalized Difference Vegetation Index average
AI Confidence Score	93.8%	Confidence level of deep learning analysis
Harvest Predicton	15 Days	Projected days remaining before harvest

AI Recommendations & Maintenance Actions

- Severe crop moisture deficit! Immediate irrigation override recommended.
- Apply systemic fungicide (e.g. Copper Oxychloride) to treat leaf rust.
- Isolate highly infected crop nodes to prevent field-wide contamination.
